**Local Partners in most European countries
Consulting & Service in national Language**

Perfectly fitted turn key solutions

TTE-Europe GmbH is an independent provider of integrated solutions with the specialization on Tracking and Tracing of Explosives for civil uses.

Due to long time professional experience of our employees, the membership at associations and close collaboration with our customers, we are able to realize all projects from one source.

We and our European partners offer:

- **Extensive consulting services**
- **Standardized and individual software packages and solutions**
- **Hardware, such as printers, scanners and mobile end devices including mobile telephone contracts**
- **Individual services and care**
- **Trainings**

TTE-Europe GmbH belonged to the leading initiators of the FEEM-Standards for intercompany data exchange throughout the entire supply chain. The offered systems are being supported by all important explosives manufacturers and importers.

Our pan-European partner network guarantees an extensive on-site customer care in the respective national language, from the first contact up to the production rollout and beyond that. Our partner network includes more than 25 partners in Europe and is further growing.

Thanks to strong cooperation with national authorities and blasting associations, our TTEpartners can provide best knowledge of the market and new regulations and support us in developing a up-to-date Tracking and Tracing solution for each country.
